MUD VOLCANOES
E. RUPTION

MUD VOLCANOES

Mud Volcanoes are mostly found in regions of high volcanic activity or where there is oil and gas deposits. They are similar to magma volcanoes and can sometimes erupt powerfully, emitting tons of mud. They are usually found in clusters in dry areas where there is no vegetation. The most active mud volcanoes can be seen in Pakistan, Romania, Azerbaijan and China. Mud volcanoes are not considered to be dangerous. Just don't sleep next to one!

OKAY DRIVER, LET'S TRY PAKISTANI! THERE HAS TO BE A CHOCOLATE VOLCANO SOMEWHERE!

1) Where is Romania?
A) ASIA
B) SOUTH AMERICA
C) EUROPE

2) What is a Pike?
A) FISH
B) BIRD
C) TYPE OF PLANE

3) How many years are there in three decades?
A) 60
B) 12
C) 30

CITY LINKS

Can you match each city to its country?

COPENHAGEN	CANADA
MILAN	AUSTRIA
CANBERRA	URUGUAY
BANGKOK	NEW ZEALAND
BUDAPEST	TURKEY
TORONTO	ITALY
WELLINGTON	DENMARK
MONTEVIDEO	THAILAND
ANKARA	HUNGARY
VIENNA	AUSTRALIA

ODD TIN OUT

There are 13 tins of beans on the shelves. Each tin has a number, but 12 of the numbers can be split into six pairs, with each pair totalling 32. So which number is the odd one out?
